Covid-19 :

Keeping The Doors of Learning Open

"School closed but teaching is not"

Students, worldwide, are having their education disrupted by the spread of Coronavirus. In this uncertain environment it's important that learning should continue.

Teachers, families and schools are trying their level best to deliver education to students via virtual platforms like zoom, click meeting, google meet, google classroom, whatsapp so that the learners can be provided positive learning experience.

We, at Radiant Academy, has taken initiative in this direction. Appropriate contents are being provided to the students via google classroom and whatsapp group. Live classes are also going on for discussion and doubt clarification. It's good to see that students are also participating actively in the virtual classes. Earlier learners were sent to school for education now teachers are reaching to the students via virtual platforms.

To make this initiative a successful one, it is important that the teachers, parents and students work together.
